

Section 1 – Market Comparison

Metrics	Option 1: AI Tool Website	Option 2: PH Calculators/ Tools	Option 3: Filipino Blog + Tools
Monthly global search volume	(Speculative) Moderate – niche AI tools (e.g. story/idea/name generators) ~50K/month	(Speculative) Low-Moderate – PH-specific calculators (many keywords <i>each</i> in low thousands)	(Speculative) Moderate – Filipino finance/business guides (e.g. OFW, local tips) ~30K/month
Monthly PH search volume	(Speculative) Low – English AI tool terms have small PH audience ~2K	(Speculative) High – local needs (e.g. “SSS contribution calculator”, “BIR tax calculator” likely each in high hundreds-thousands monthly)	(Speculative) Medium – Taglish personal finance/ OFW topics (5-10K combined)
Competition (SEO)	High – Many established global AI tool sites and DIY generators (speculative)	Medium – Some local competitors but niche (speculative)	High – Many Filipino blogs cover similar topics (speculative)
Avg. AdSense RPM	Moderate (est. ₱50–₱150) – general tech/tools ads (lower than finance; industry data: Asian tech CPM often \$1-3 [32†L79-L82]).	High (est. ₱150–₱300) – finance/insurance niche. <i>Industry: Asian finance sites ~\$3-\$8 RPM</i> [32†L79-L82] .	High (est. ₱150–₱300) – finance/ personal finance niche (same Asian \$3-\$8 RPM [32†L79-L82]).
Time to first Google ranking	~6-12 months for new site (speculative). <i>Industry data shows ~1 year on average for first-page rankings per post</i> [59†L212-L220] .	~6-12 months (speculative). <i>Less global competition but similar SEO timeline</i> [59†L212-L220] .	~6-12 months (speculative). <i>Content-heavy niches typically ~1 year to first-page</i> [59†L212-L220] .
Time to AdSense approval	~1-2 months prep (build ~20-30 quality pages) + 1-2 week review [45†L96-L102] .	~1-2 months prep (quality content/tools) + 1-2 week review [45†L96-L102] .	~1-2 months prep (quality content) + 1-2 week review [45†L96-L102] .

Metrics	Option 1: AI Tool Website	Option 2: PH Calculators/ Tools	Option 3: Filipino Blog + Tools
Time to first ₱1,000	(Speculative) 3–6+ months . Depends on reaching enough traffic at assumed RPM.	(Speculative) 3–6+ months (higher RPM helps, but needs traffic).	(Speculative) 6–12+ months (SEO-build more content to reach threshold).
Top traffic sources	<i>SEO (Google organic ~50–60%)</i> 【52†L195-L197】 ; plus direct. Social minimal.	<i>SEO (Google organic majority)</i> 【23†L143-L149】 ; also direct/ bookmarks.	<i>SEO (Google organic)</i> , plus social (FB, YouTube) and direct/ bookmarks.
Biggest risk	High competition and rapid AI trends (speculative).	Outdated or dull content; policy changes (speculative).	Google algo changes; saturated content (speculative).

- *Notes:* Values above are broad estimates. For example, Google's analysis indicates it often takes **~1 year** for a new post to rank on page one 【59†L212-L220】 . AdSense guidelines suggest 20–30 quality posts and ~1–2 week review 【45†L96-L102】 . Philippine traffic for calculators and finance queries tends to be strong (e.g. `moneymax.ph` gets ~30% organic search 【23†L143-L149】), whereas niche AI tool terms have smaller local volumes.
